Cleanly atmospheric, *Fall Submissions* exists somewhere on the borderline between IDM and ambient techno, but either way is the perfect excursion into the musical microcosmos of Antiguru, aka Darin Marshall—founder of the Belief Systems label. Precise as Autechre but with the lightness and amiability of Plone or CiM, this album makes for *really* enjoyable listening and is also accessible enough to appeal to fans of Boards of Canada, Stereolab, and Slowdive. Standout tracks include "Blue Line," "Undersea Steamship," and "Peering."

Scientology

From Wikipedia, the free encyclopedia

Scientology is a *body of teachings and related techniques* created by *American* science fiction author *L. Ron Hubbard* in 1952 as an outgrowth of his earlier *self-help* system, *Dianetics*.^[1] Hubbard later characterized Scientology as an "applied religious philosophy" and the basis for a new religion.

Scientology also refers to the *Church of Scientology*, founded in 1953^[2] and by far the largest organization promoting the practice of Scientology. Today, the Church itself operates under the auspices of the *Religious Technology Center*, the organization that holds the *trademarks* and *copyrights* of Dianetics and Scientology and monitors their use by the Church and its affiliates such as *WISE* or *ABLE*.^[3]

Scientology holds that an individual is basically an *immortal spiritual being* that has a *body* and a mind, and that each individual is adversely affected by forgotten decisions left over from past trauma and by stored *mental energies*. Scientology training and counseling aims to eliminate these adverse effects and to allow devotees to regain native spiritual abilities lost over the course of many lifetimes.^[4] Scientology claims to be applicable in all facets of life, including programs for organizational management^[5], *study skills*^[6], and *drug-rehabilitation*.

Scientology and the organizations that promote it have remained highly *controversial* since their inception. Journalists, courts and the governing bodies of several countries have stated that the *Church of Scientology* is an unscrupulous commercial enterprise that harasses its critics and victimizes its members.^{[7][8][9]} Journalists, critics and religious groups worldwide have often referred to the organization as a *cult*.^{[10][11]}

Complete rewrite of the Scientology WP:LEAD

[edit]

There was extensive discussion on the WP:LEAD and I thought we had an agreement and suddenly out of nowhere the WP:LEAD is complete changed with no discussion. This a fault! The changes don't follow the above previous discussion. Bravehartbear 03:29, 28 June 2007 (UTC)

BTfromLA is an editor that used to edit quite extensively here. It would not be appropriate for him to come back out of the blue and change things back to perhaps how they were months ago when he last edited here if such a change disregards intervening discussion. The lead should reflect current discussions. If BT wants to make a drastic change he should please come here and discuss it. --Justanother 03:36, 28 June 2007 (UTC)

which changes are bias exactly ?

there was an agreement to change the proportions of the lead and before there were already discussions as well I think BTfromLA improved the lead -- Stan talk 03:41, 28 June 2007 (UTC)

Thank you, Stan. It is my perpetually naive hope that people will look at changes to these articles and ask the question

L. Ron Hubbard

From Wikipedia, the free encyclopedia

The **neutrality** of this article is **disputed**.

Please see the discussion on the [talk page](#).

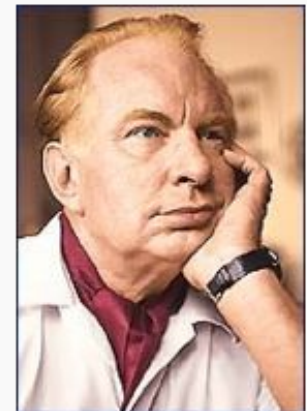

Lafayette Ronald Hubbard (13 March 1911 – 24 January 1986), better known as **L. Ron Hubbard**, was an [American fiction](#) writer,^{[1][2][3]} former [United States Navy](#) officer and creator of [Dianetics](#) and founder of the [Church of Scientology](#).

Hubbard was a highly controversial public figure during his lifetime. Many details of his life remain disputed; official Scientology biographies present Hubbard as "larger than life, attracted to people, liked by people, dynamic, charismatic and immensely capable in a dozen fields,"^[4] while independent articles and biographies of Hubbard and accounts by some former Scientologists paint a much less flattering, and often sinister, picture. In many cases they flatly contradict the biographical accounts presented by the Church of Scientology.^{[5][6][1][7]}

Template documentation

[\[view\]](#) [\[edit\]](#)

This documentation is transcluded from [Template:Cite book/doc](#). ([edit](#) | [history](#))

This template is used to [cite sources](#) in Wikipedia. It is specifically for books. This template replaces the deprecated `{{book reference}}`.

Usage

All fields *must* be [lowercase](#).

Copy a blank version to use. Remember to use the "|" (pipe) character between each field. Please delete any unused fields to avoid clutter in the edit window.

No templates or magic words are necessary when using an [ISBN](#), [OCLC](#) number, or [DOI](#) as an identifier. Instead of using the `id` field in these instances, simply use the appropriate field. For instance, type `isbn=` followed by the number instead of `id=ISBN`. Templates are available for other identification number types to be used in the ID field (`{{ISSN}}`, `{{LCCN}}`, `{{LCC}}`, etc.) if these aren't available. See also the complete [description of fields](#).

Full version (copy and paste text below and delete parameters you don't need)
